DETAILED ACTION

Response to Remarks

- 1. The Applicant's Remarks, filed May 19, 2009, have been entered and have been carefully considered. No claims are amended and claims 5 8 are pending. The invention as currently claimed is not found to be patentable for reasons herein below.
- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

- 3. Claims 5 and 7 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Civardi et al. (US 3,716,397) in view of Fukushima (US 4,046,504) and Streicher et al. (US 4,983,185). The rejection is maintained. See the Office Action dated April 6, 2009 for details.
- 4. Claims 6 and 8 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Civardi et al. (US 3,716,397) in view of Fukushima (US 4,046,504) and Streicher et al. (US 4,983,185) as applied above, and further in view of Pedain et al. (US 3,867,350). The rejection is maintained. See the Office Action dated April 6, 2009 for details.

Response to Arguments

5. Applicant's arguments filed May 19, 2009 have been fully considered but they are not persuasive.

Application/Control Number: 10/522,519

Art Unit: 1794

6. Applicant argues that Civardi fails to disclose a fiber-entangled substrate containing ultra-fine polyester fibers impregnated with polyurethane but rather discloses an elastomeric sheet of polyurethane that is porous. Applicant points to the passage of column 1, lines 7 – 11 which states that the elastomeric polyurethane sheet is "substantially free of pre-formed fibrous reinforcing fabric". It should be noted that the Examiner does not rely on this passage to teach the claimed invention. Instead, the Examiner relied on the discussion in column 6, lines 60 – 68 which indicates that that a substrate can be included and be a polyurethane-impregnated non-woven felted batt of polyester fibers. At the beginning of the paragraph, Civardi states "while the invention finds its greatest utility for the treatment of fleeceless elastomeric sheet material, it may also be used with those microporous elastomeric material on a fibrous substrate which substrate is preferably impregnated with elastomeric material. Although the embodiment of "greatest utility" has no fibrous substrate, this does not take away from the fact that Civardi does disclose embodiments where the non-woven felted batt of polyester fibers is impregnated with polyurethane.

Page 3

7. Applicant argues that Civardi fails to teach that the polyurethane which is pigmented is impregnated into the fiber-entangled substrate. As the Applicant acknowledges in his arguments, an additional pigmented solution of elastomeric polyurethane is adhered to the substrate. The claims only require that the "suede artificial leather" is impregnated with a polyurethane not that the fiber-entangled substrate is impregnated with the polyurethane. Furthermore, the Examiner submits that the surface treatment of the pigmented polyurethane would at least slightly impregnate

Art Unit: 1794

the substrate as Civaldi specifically states in column 6, lines 60 – 68 that "the burnishing may be effected so as to spread a thin layer of fused polyurethane to **cover exposed cut fibers** at the edge of the piece being burnished".

8. Applicant does not provide any further arguments regarding the secondary references. Please see the Examiner's comments above concerning the teachings of Civardi.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JENNIFER A. CHRISS whose telephone number is (571)272-7783. The examiner can normally be reached on Monday - Friday, 8:30 a.m. - 6 p.m., first Friday off.

Application/Control Number: 10/522,519 Page 5
